**MORE OPPORTUNITIES**

**One Tam**

As a founding member of One Tam, Marin Municipal Water District is working with our partners to monitor and protect the long-term health of Mt. Tamalpais.

Our collective efforts are guided by science and powered by community stewardship. Through participating in hands-on service programs and research projects, volunteers of all ages deepen their connection to the mountain and cultivate a lifelong ethic of stewardship.

Come join us at one of our Saturday workday celebrations in 2020:

- ✓ Hands on Tam: **February 1**
- ✓ Bald Hill Broom Bust: **February 8**
- ✓ Mt. Tam Earth Day: **April 18**
- ✓ National Trails Day: **June 6**
- ✓ Mt. Tam Day of Thanks: **November 21**

Learn more about One Tam and how you can get involved at: [onetam.org](http://onetam.org)

**Linking Individuals To Their Natural Community (LINC) summer high school internships**

**SIX WEEKS, FULL TIME, SUMMER 2020**

LINC interns gain career and leadership skills, while assisting with service projects such as trail work, growing plants, and habitat restoration. No experience necessary. Educational award of $1,000 upon completion. Applications are due in February. Visit [parksconservancy.org/LINC](http://parksconservancy.org/LINC) for information.

**Academic internships**

Join a diverse team of more than 40 college students to make a difference in your community! We offer opportunities to work in business management, media and communications, ecological restoration, historic landscape stewardship, education and youth programs, historical interpretation, park administration, and more.

Available to students at College of Marin, San Francisco State University, and City College of San Francisco. Visit: [parksconservancy.org/volunteer/academic-internships](http://parksconservancy.org/volunteer/academic-internships)

STEWARDSHIP PROGRAMS

Turtle observers
Turtle observers monitor and record behavior of native western pond turtles, California’s only freshwater turtle and a “vulnerable species.” Ages 8 and up. Train February 29; monitor through May.

Frog docents
Frog docents monitor human activity and educate hikers near the breeding habitat of foothill yellow-legged frogs, a species of special concern. Must be 18 or older. Train March 21; monitor through June.

Community science opportunities
Contribute to the conservation of Mt. Tam’s natural resources by monitoring sensitive species. Your participation in scientific research can help shape the world we live in. Projects vary by season.

VOLUNTEER EVENTS

Habitat restoration
ONE OR TWO SATURDAYS PER MONTH, 9 A.M. - NOON
Join our habitat restoration volunteers and learn about Marin’s unique plant and animal life, while helping remove invasive weeds, and plant natives to restore sensitive habitat. Families welcome! Ages 8 and up; under 16 must be with an adult; under 18 must bring a signed permission form.

Trail crew
QUARTERLY ON SATURDAYS, 9 A.M. - 2 P.M.
Our trail volunteers maintain and improve Mt. Tam’s trail network and enhance natural habitat. We install and repair bridges, fences and stairs; improve drainage, erosion control and tread; and cut back vegetation along trails. Ages 13 and up, under 16 must be with an adult; under 18 must bring a signed permission form.

School field trips to the watershed
Through stewardship, students learn about the ecology of our local watershed and forests, as well as water conservation and supply. Students engage in habitat restoration and/or scientific monitoring. Programs available for grades 3-5, 11-12, and college. Programs are offered on a first-come, first-served basis, at no cost to schools in Marin Water’s service area.

Marin Wildlife Picture Index Project
PHOTO CATALOGING PARTIES: SECOND SATURDAY & FOURTH TUESDAY OF EACH MONTH, 1 - 4 P.M.
Marin’s public land management agencies are collecting wildlife data across the county using cameras to monitor animal populations. Community scientists help identify species in the photos and maintain the equipment in the field. Ages 18 and up. Register at: onetam.org

Create your own event
Are you looking for a fun and rewarding outdoor activity for your school, club, business or community group? Contact us to schedule a habitat restoration event. Sites and activities are matched with the interests and abilities of the group.
