Project is reviewed by MMWD staff.

Based on review:

- Project is determined to be exempt from graywater requirement.
  - Availability letter is drafted, reviewed, and sent to permitting agency.

- Project is determined to trigger graywater requirement, provided the installation/upgrade of water service is necessary.
  - Availability letter sent to permitting agency and property owner stating a graywater system may be required. The graywater requirement info sheet is included with the availability letter to the property owner.
  - Applicant is required to submit completed graywater compliance form when applying for new or upgraded water service from MMWD.
  - Applicant submits application for water service and pays applicable fees. Service is installed or enlarged.
