ITEM: Annexation of Single Family Residence at 1499 Lucas Valley Rd, San Rafael
(APN 165-010-89) into District boundaries

SUMMARY

In 1997, the property at 1499 Lucas Valley Road, San Rafael, connected to the District's water system and began receiving water from the District. The property is an 8.98 acre parcel comprising a single-family residence with 2-living units, a horse arena, and a barn. In addition, this upslope wooded property with developed and undeveloped open spaces is zoned PD(1701) -Planned Development District and any plan to increase the number of living units would require a rezoning of the property.

The property at 1499 Lucas Valley Road is located outside of the District's service area (see Attachment 1). At the time the property was connected to the District in 1997, annexation of the property into the District's service area did not occur. The District would like to resolve this outstanding issue and the property owner, Michael J. Stone, has supplied 100% consent to allow for the District to petition the Marin County Local Agency Formation Commission ("LAFCO") to annex this parcel into the District's service area. District staff will present a resolution for the annexation of 1499 Lucas Valley Road at a future regularly scheduled meeting of the Board.

FISCAL IMPACT

The total cost to the District to petition Marin County LAFCO to annex this parcel into the District's service area is estimated at \$5,246.09, to be funded by the District's FYE 2021 Operating Budget.

ITEM: Alpine/Bon Tempe Raw Water Transfer Pipeline Replacement Project (D20027)

SUMMARY

The Alpine/Bon Tempe Raw Water Transfer Pipeline Replacement Project (Project) will install approximately 300 feet of new pipe to replace old, leak prone and seismic deficient pipe in the Marin Municipal Water District's watershed lands. On November 17, 2020, the District opened construction bids for the Project. District staff will make a recommendation for contract award at a future regularly scheduled Board meeting.

DISCUSSION

The District transfers raw water from Alpine Reservoir up to Bon Tempe Reservoir through a 2,600-foot long, 24-inch diameter welded steel pipe installed in 1956. A 300-foot section of pipe located near Alpine has deteriorated and needs to be replaced. The Alpine / Bon Tempe Raw Water Transfer Pipeline Replacement Project (Project) will replace this 300 foot section of leak prone pipe. This raw water transmission line is a critical asset to the District as it the only source of raw water supply from Alpine Reservoir to Bon Tempe Reservoir. The Project will take place in the location described in Table 1 and shown on the map provided in Attachment 1.

Bid Opening:	November 17, 2020
Project Award:	December 1, 2020
Estimated Completion Date:	April 2, 2021
Duration:	123 days

ENVIRONMENTAL REVIEW

The Project is Categorically Exempt pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15302(c), Replacement or Reconstruction, because it is the replacement of water pipeline involving negligible or no expansion of capacity. A copy of the draft Notice of Exemption is enclosed as Attachment 2.
