Subject: Funding of Part-Time Directors' Health Insurance

I am urging you to not adopt the proposed resolution to fund the health insurance costs of part-time directors. Doing so, is in violation of Government Code Sec. 22892 which applies to "employees and annuitants." It is well settled law that part-time or non-employee directors are NOT employees in many parts of California and Federal law (ex: ERISA) for the purpose of obtaining benefits and benefit protection. MMWD already has extraordinarily high water and other rates, when compared to other water districts in California. To add these expenses in determining our rates is a SHAM. (SHAME on you JACK GIBSON! with whom I have practiced law). Do not go through with this farce. It will generate litigation and more unnecessary costs to rate payers.

Subject: drought is imminent

This is my 3rd outreach to MMWD. Since my first 2 communications reservoir storage has declined, now far below this time last year. Meanwhile your organization continues to let customers believe they can use water with no restrictions. Water is running down the street from car washing, over watered landscaping and leaks.

Your management and lack of communication is absolutely negligent.

The national weather service is forecasting far below normal rainfall.

Why on earth are you failing to urgently advise your customers, through all channels, that they need to conserve water?

You are paid to advise MMWD, you have a duty to Marinites, you are failing miserably.

Customer
