## 8. Watershed Protection:

#### Rangers Respond to Cardiac Emergency

In early February two Rangers responded to Carson Falls Trail for a hiker having a heart attack. One Ranger assisted Fire personnel with patient care. The second Ranger setup landing zones for a rescue helicopter and an air ambulance helicopter. The patient was stabilized, then flown to the John Muir Medical Center.

#### Vehicle Theft at the Leo Cronin Lot

Rangers took a vehicle theft report from the Leo Cronin Parking Lot. A visitor parked his newly purchased Harley Davidson motorcycle and hiked up to Kent Lake. When he returned he discovered his locked bike had been stolen.

#### Human Remains Found on Watershed

During Presidents Day Weekend a visitor found human remains on the Watershed. The Coroner's Division of the Sheriff's Office is taking the lead in the investigation. Currently there are two missing persons from 2020 who investigators believe may be on the Watershed. The Coroner is awaiting DNA results.

#### High Watershed Use

The Watershed remains busy with a high volume of visitors. On weekends and Holiday the parking lots fill to near or at capacity. On two occasions this month the entrance at Sky Oaks was closed by Rangers due to no available parking.

As shown in Table 2, the rent was scheduled to increase from \$327,659.52/year to \$378,771.89/year, an increase of \$51,112.37, effective November 2020. The Covid-19 pandemic has negatively impacted the Tenant. In response, the District and Tenant have agreed to execute the Fourth Amendment to Lease No. 47 which includes the following terms:

- Defers the November 2020 rent increase one year, and
- Includes payment of the Deferred Amount of \$51,112.37 over a four (4) year period, beginning November 30, 2021 and ending November 30, 2025 at the rate of \$12,778.08 per year. The annual rent payment during this period is \$391,549.97/year (\$378,771.89 + \$12,778.08 = \$391,549.97/yr).

A draft copy of the Fourth Amendment to Lease No. 47 with the Larkspur Landing 100 Corporation for lease of District property at 100 Larkspur Landing Circle is provided in Attachment 2.

In summary, District staff recommend the board to authorize the General Manager to execute the Fourth Amendment to Lease No. 47 with the 100 Larkspur Landing Corporation for lease of District Property at 100 Larkspur Landing Circle.

## **FISCAL IMPACT**

The fiscal impact to the District will be a one year deferment in the rent increase, for a total deferment of \$51,112.37, which will be repaid to the District by the Tenant under the Fourth Amendment to Lease No. 47 over the following four years.

ITEM: Drought Update

#### **SUMMARY**

The District's total reservoir storage volume as of March 11th is 62% of the historical average or 56% of total storage. Rainfall to date is 18.4-inches which is lower than the 27.9-inches received last year by this time and just 43% of the average for this time of year. The 10-day forecast includes the chance intermittent showers, and while there is still the possibility of rainfall in late March or April to increase reservoir storage levels, staff are preparing for dry conditions to persist through the coming months. In response to the drought, the Board adopted a resolution calling for voluntary conservation at the February 16<sup>th</sup> meeting. Staff is continuing to pursue supply optimization, while prioritizing the conservation actions and public messaging to educate and engage with our customers. Staff will provide a presentation to update the Board on all drought-related activities at this meeting and discuss potential implementation of mandatory restrictions.

#### **DISCUSSION**

## **Water Supply and Production:**

- As of February 28, 2021, the District had 44,930 acre-feet of reservoir water storage, which is 56% of capacity and 37% below average for this date.
- In February, the District's total gross water production was 1,339 acre-feet, with 641 acre-feet from the District's reservoirs and 698 acre-feet of imported water.
- The average rate of water production for February was 15.7 million gallons per day (MGD) compared to a peak summertime demand of approximately 35 MGD.
- For habitat benefit, in February, the District released a total of 1,286 acre-feet of water from Kent Reservoir into Lagunitas Creek and from Soulajule Reservoir into Walker Creek.
- In February, the water source for the San Geronimo Treatment Plant (SGTP) was Kent Reservoir, and for the Bon Tempe Treatment Plant the water sources were Phoenix Lake and Bon Tempe Reservoir.

**Meeting Date:** 03-16-2021

## **Drought Response:**

A Drought Task Force was instituted consisting of staff throughout the organization to work collaboratively to develop and implement key initiatives to optimize our existing water supply and implement conservation actions.

#### **Water Supply Projects:**

- <u>Utilize Phoenix Lake</u> Phoenix Lake is a reserve reservoir, used only during periods of very dry weather. Pumping of Phoenix Lake started on February 10th for treatment at Bon Tempe Treatment Plant. As of March 11<sup>th</sup>, the reservoir is 12.9 ft down from the spillway and 187 AF have been pumped and treated. Pumping of Phoenix Lake is expected to continue for approximately 1 to 2 more weeks.
- <u>Utilize Soulajule Reservoir</u> Soulajule reservoir is a reserve reservoir and not used during normal water supply conditions. Given the low levels in storage and dry conditions District staff will make preparations for pumping of Soulajule, tentatively scheduled for April 2021.
- Optimize the Use of Supplemental Water Water imported from the Sonoma County Water Agency has been an important part of the District's water supply since the 1970s, and accounts for approximately 25 percent of our water supply. The District has been and continues to use this supply source to its fullest availability. As of the end of February the District has purchased 98% or 5200 acre-feet of the 5300 acre-feet that is normally received by end of June. The District is continuing to utilize this water to the maximum extent practicable. As of mid-February, North Marin Water District began backfilling Stafford Lake, consequently reducing the available capacity in the aqueduct to 6-million gallons per day. Capacity in the aqueduct is expected to return to maximum available flows in the first weeks of April once backfilling of Stafford Lake is completed.
- Kastania Pump Station Rehabilitation Design At the February 16, 2021 meeting, the board approved hiring a consulting team to assist staff in the evaluation and development of a rapid rehabilitation plan for Kastania pump station. The team has reviewed engineering plans, in the process of developing a hydraulic model to help understand the potential yield for this project. In addition the team has made site visits to assess the condition of the pump station and site constraints. The project team will return to the Board on April 6<sup>th</sup> with preliminary recommendations.
- <u>Las Gallinas Valley Sanitary District Recycled Water Treatment Plant Update</u> Distribution of recycled water is expected to resume in mid-March as LGVSD completes
   the upgrade of the Recycled Water Treatment facility. Staff are following the reliability
   and acceptance testing closely. The Functional Acceptance Testing (looping Title 22
   water within the Plant) is currently under way and is on track for the Reliability
   Acceptance Testing (distribution of Title 22 water to MMWD and NMWD) starting

**Meeting Date:** 03-16-2021

March 15th. MMWD's recycled water system is ready to distribute recycled water as soon as it is available.

- Recycled Water Truck Hauling Staff have confirmed with CMSA that their secondary 23
  water is available for sewer flushing and construction dust control. In addition staff are
  collaborating with LGVSD to understand how we can develop a recycled water fill
  station to allow members of the public to collect recycled water for irrigating their
  plants during this drought period.
- <u>Suspended Water Quality Flushing Program</u> To maintain water quality and minimize discoloration, the District's water mains are periodically flushed. While the volume of water consumed in flushing is low in comparison to other uses, given the drought, staff has suspended the flushing program (other than for water quality issues) and intends to resume the practice when appropriate.
- <u>Leak Detection</u> District staff are pursuing an evaluation of current leak detection practices and technology for opportunities to improve or enhance the existing District program and will be participating in the first Regional Water Loss Control Working Group for Bay Area utilities on March 17<sup>th</sup>. Additionally, leak repair has been given the highest priority during this period of drought, decreasing a backlog of leak investigations from 20-30 leaks to 7 confirmed minor leaks scheduled for repair.
- <u>Environmental Releases</u> Staff is in the early stages of exploring the potential for modifications in environmental releases from Kent Lake and will be bringing a discussion item to the Watershed Committee on March 18<sup>th</sup>.

#### **Conservation Public Outreach:**

- Mailed 2,200 sector-specific letters to inform various industries, organizations and water users of drought conditions as well as emailed 24 neighborhood associations.
- Distributing yard signs through the Thursday and Sunday Farmers Market organizers, via a social media push, and to homeowner associations
- Training field staff to educate customers on water waste and embrace call to action
- Scheduling presentations with cities, towns, and community groups. Currently City of San Rafael and Town of Corte Madera are scheduled for March 15<sup>th</sup> and April 6th, respectively. San Rafael Harbor and Marin Sunrise Rotaries are scheduled for April 27<sup>th</sup>.
- Consistent and frequent messaging emphasizing the dry conditions and need for water conservation: Increased social media messaging on Facebook, Twitter, Nextdoor and Instagram includes water saving tips, educational information about the district's water

**Meeting Date:** 03-16-2021

code, and rebates and incentives.

 Website updates include a new landing page on the importance of water conservation during drought conditions.

- Customer newsletters and additional bill inserts that support and reinforce current conservation messaging have been included in March/April water bills
- With continued below average rainfall in February, staff presented at the March 2<sup>nd</sup>,
   2021 Board meeting preliminary options for discussion regarding potential mandatory restrictions in the coming months if dry conditions persist.

### **FISCAL IMPACT**

As previously shared with the Board, the combined loss in revenue and unbudgeted expenses due to the drought is projected at \$12.5M over the next 8 months. The District's Rate Stabilization Revenue of \$9.4M, along with tight expenditure controls, is anticipated to address the deficit.
