RESIDENTIAL CONSULTATIONS

During this 60–90 minute indoor and outdoor home assessment, a staff expert will provide you with a personalized water-use history report and will:

- Show you how to read your meter to monitor consumption and check for leaks.
- Help evaluate the efficiency of your plumbing fixtures and appliances.
- Check for toilet leaks.
- Provide high-efficiency faucet aerators and showerheads as needed.
- Assess your irrigation system and review your irrigation scheduling.
- Answer questions and offer tips on ways to reduce your water use.

Phone consultations are also available.

COMMERCIAL CONSULTATIONS

Water use varies greatly from business to business. During this 60 minute appointment, our staff experts will work with you to find water savings based on your unique needs making your operations more water-efficient, reducing your water bill, improving your bottom line —and conserving our precious water resources.

The on-site visit will include:

- Guidance on how to read your meter and check for leaks.
- An evaluation of fixtures, appliances, and water-use patterns.
- A review of your irrigation scheduling.
- Information about water-efficiency technologies that may be appropriate for your business.

You'll also receive a customized water-use history report that can help you understand your businesses' water bill.

LARGE LANDSCAPE CONSULTATIONS

These appointments are specially designed for businesses, parks, schools, and other sites with large area landscapes and may last up to two hours depending on the size of the site. The individual(s) responsible for maintaining the irrigation system must be present for the duration of the visit so that a staff expert may:

- Assess your irrigation system's efficiency.
- Review your irrigation system scheduling.
- Discuss low-water landscape practices, including plant selection and grouping.
- Provide information about new irrigation technologies.
- Show you how to read your meter and check for leaks.
