

MARIN CITY WATER PIPELINE REPLACEMENT

beginning January 2025!

Marin Water will soon begin replacing aging and leak-prone underground water pipeline along streets in Marin City. Service laterals, which connect a home or business to the water system, will also be replaced. This project will occur in two phases and is expected to conclude in the fall of 2026.

A map and timeline is provided on the back of this flyer along with more details regarding what to expect during construction.

The project is largely funded by a California Department of Water Resources grant. Marin City Climate Resilience, who worked hard to help to secure the grant funding, is partnering with Marin Water to provide project outreach and engagement to the community.

This pipeline replacement project will:

- Ensure high quality drinking water for Marin City now and for the future
- Eliminate water waste caused by large leaks in the water system
- Reduce water service interruptions that have previously impacted Marin City
- Strengthen the water system to better withstand and more quickly recover from natural disasters such as earthquakes or wildfires

Construction questions?

**MARIN
WATER**

This project replaces:

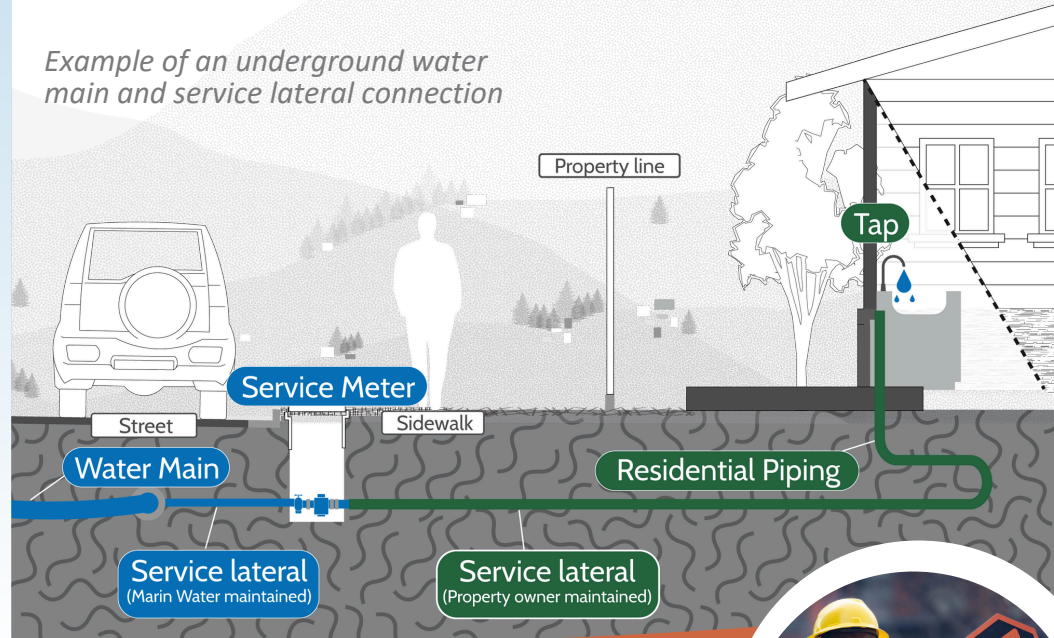

3.65 MILES OF WATER MAINS

Owned by Marin Water, these mains are large underground sections of pipeline that carry drinking water from Marin Water's pumping stations to customer properties.

192 SERVICE LATERALS

Owned by Marin Water, this part of the lateral pipe connects the water mains to the service meter which connects to customer-owned piping.

Example of an underground water main and service lateral connection

What to expect during construction:

- Construction will occur on weekdays, 8 a.m. to 5 p.m., setup and cleanup activities may occur outside this timeframe.
- Heavy equipment and construction personnel will be on the roadway. Please follow traffic control signs, reduce vehicle speed, and allow for extra time to drive through the area.
- Your water service may be interrupted for short periods of time. If so, Marin Water will notify you 24-48 hours in advance by hanging a notice of the planned water shut-off on your front gate or door. If a medical condition exists which requires that you receive continuous water service, notify us at 415-945-1560 as soon as possible.
- Marin Water and the project contractor will take all measures possible to minimize inconveniences associated with this project, including noise and traffic delays.

Construction schedule:

*This is a two-phase project.
Severe weather conditions may
impact the construction schedule.*

Phase I

Begins: January 2025

Completed: Fall 2025

Phase II

Begins: Fall 2025

Completed: Fall 2026
